

Task Management System

End-User Tutorial with Simple Page Snapshots

This guide is for daily users. It explains the front-end pages and buttons used for normal work. It does not explain admin setup.

Welcome Page - Main Buttons

1 Today Work

2 Report Section

3 Task Master

4 Pending Approvals

5 Logs

Main welcome area

Click Tutorial PDF to open this guide.

Use sidebar buttons for daily work.

1. Login and Welcome Page

Login with your email and password. After login, the welcome page shows the buttons available to your user account. If a button is missing, you may not have access to that page.

2. What the Main Buttons Do

Today Work opens your daily task list. Report Section opens work reports. Task Master is for creating or requesting task changes. Pending Approvals shows waiting requests. Logs shows request history.

Today's Work - Daily Task Screen

Date

Go Load Work

Task Name	Status	Start	End	Remarks

Update status and remarks where your access allows.

3. Today's Work

Select a date and load work. Review task rows and update status, start time, end time, and remarks when allowed. View-only access means you can see the task but should not

edit or create work for that department/person.

4. Task Master

Use Task Master only when you need to add a task or request a change. If approval is required, your change will be sent as a request.

5. Pending Approvals and Logs

Pending Approvals shows requests waiting for review. Logs shows whether your request is pending, approved, or rejected.

Report Section - Filter Screen

D1 Start Date

D2 End Date

F Status Filter

Go View

Select date range and status, then view the report.

6. Report Section

Choose start date, end date, and status filter, then view the report. Use this page to check due, WIP, completed, and final approved work.

7. Best Daily Practice

Start from Today Work, update each task status honestly, write useful remarks, and use Logs to check raised requests.
